

Moistick® digital
Electronic watering indicator

Easy to water properly
thanks to this new type of **soil moisture sensor**

Moistick® digital, intelligent help for ideal watering!

- Continuous display of current moisture status.
- Monitors your plants' watering needs (3 selectable moisture levels).
- Flashing alarm to signal the ideal time to water.
- Can be used with all plant substrates.
- Also suitable for outdoor use.
- Very easy to use.
- Go on holiday reassured that those looking after your plants cannot now make mistakes.

Strong, healthy plants thanks to this innovative soil moisture sensor!

Correct watering is decisive if all your plants are to thrive!

Moistick® digital provides a reliable indication of when plants need water and prevents drying out as well as over-watering. Plants enjoy stress-free, stronger growth and become more resistant to pests.

Using it couldn't be simpler: just set one of the 3 moisture levels according to the instructions and insert the **Moistick® digital** into the root ball. The current moisture status can be read off after 15 minutes. A flashing alarm alerts you to the ideal time to water (q.v. the detailed operating instructions). The **Moistick® digital** can be used indoors, on terraces and gardens. Powered by two AAA batteries (included) that are easy to replace **Moistick® digital** - a Swiss innovation - patented worldwide.

Watering alarm (LED flashes)

1-switch operation:

- On / Off
- Programming mode for
 - Indoor/Outdoor
 - Moist level selection
- Alarm Reset after watering

Indoor / Outdoor selection

- Indoor sensing every 6 hours
